

models/SH_SqlDataField.h

```
graph TD; A[models/SH_SqlDataField.h] --> B[QObject]; A --> C[QtQuick];
```

The diagram illustrates a class hierarchy. At the top, a grey rectangular box contains the text 'models/SH_SqlDataField.h'. Two blue arrows originate from the bottom edge of this box. The left arrow points diagonally down and to the left to a white rectangular box containing the text 'QObject'. The right arrow points diagonally down and to the right to another white rectangular box containing the text 'QtQuick'. This visualizes that 'SH_SqlDataField.h' inherits from or is associated with both 'QObject' and 'QtQuick'.
